## Why choose the Comhan hoarding profile system?

- ✔ Installation **without drilling** into the profile or pole
- ✔ Quick installation with **adjustable stainless steel tension bands**
- ✔ No **paint damage** or **risk of corrosion**
- ✔ Suitable for round poles **Ø 55–75 mm**
- ✔ Long **lifespan** and **low maintenance**
- ✔ Also available as a **panel mounting profile** for **ACP boards**

## Hoarding system EF50

Comhan Holland introduces an improved hoarding profile system – faster, easier, and more durable to install.

[www.comhan.com](http://www.comhan.com)

With traditional hoarding systems, both the aluminum profiles and the (painted) steel posts need to be pre-drilled. This is not only time-consuming and labor-intensive, but it also increases the long-term risk of corrosion.

### Quick installation

With the new Comhan hoarding system EF50, this is no longer necessary. Our upgraded hoarding profiles are mounted using **adjustable stainless-steel profile brackets** and **stainless-steel tension bands** - eliminating the need for drilling. The result: **faster installation, less labor, no damage to coatings**, and a **significantly longer lifespan** of the fence posts.

A protective rubber strip is included to prevent damage to round posts with a diameter range of **Ø 55–105 mm**, ensuring a secure and vibration-free fit.

### Perfect for:

Sports fields, training complexes, and any location where sponsor boards need to be installed quickly and professionally.

## Hoarding system EF50

Article number:	Article name:	Surface finish:
1. 138500	Hoarding system EF50 top profile	mill
2. 138502	Hoarding system EF50 top profile	anodized
